PROFESSIONAL SUMMARY

Motivated Computer Science student with strong foundations in Python backend development, frontend web technologies, and Git-based workflows. Experienced in building responsive interfaces, automation tools, and multi-tenant backend systems using modern development practices. Comfortable working in Linux (Ubuntu) environments and focused on improving problem-solving and software engineering skills.

WORK EXPERIENCE

Web Developer Intern – Southeast Business Group(SBG) *April 2026 – Present*

- Developing backend services and application logic using Python.
- Collaborating on responsive frontend designs using modern web technologies.
- Managing version control workflows with Git and GitHub.
- Working in Linux (Ubuntu) environment for development and deployment tasks.

TECHNICAL PROJECTS

- **Multi-Tenant SaaS Backend:** Built a Python-based multi-tenant system with Git workflows using Development, Staging, and Main branches.
- **DevOps-Style Automation Engine:** Created automation tools to streamline repetitive development tasks and improve workflow efficiency.
- **Frontend UI Implementation:** Developed responsive interfaces using HTML5, CSS3, JavaScript, Bootstrap, and Tailwind CSS.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Allama Iqbal Open University, Islamabad (In Progress)

Intermediate (ICS)

Completed: September 2020

TECHNICAL SKILLS

Programming: Python, JavaScript

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS

Tools & Platforms: Git, GitHub, Linux (Ubuntu), CLI

Concepts: Backend Architecture, Multi-tenancy, Version Control

LANGUAGES

Urdu: Native

English: Professional Working Proficiency
